DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-25 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Features critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The independent claims lack essential features since, according to the remarks stated in pages 7-8 of the amendment, filed 1/28/03, it is the combination of these features that provide the harmonic frequencies. Thus, applicant should amend the independent claims to state all the essential/critical features stated in the specification which combined provide the harmonic frequencies.

3. Claims 1-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant discloses that a computer program was used to design the bell. Since the invention deals with the design of the bell, the computer program is needed in order for a person having ordinary skill in the art to be able to make and/or use the invention. Thus applicant should provide a copy of the computer program. See MPEP 608.05 37, CFR § 1.96(c).

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-13, 15-21 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. As cited by Applicant, the Collins Encyclopedia of Music, pages 20-21, and the Lehr paper, page 20, "an harmonic bell..." having frequencies in the ratios 1,2,3,...N, "...is an impossibility." An invention that cannot exist is inoperative and lacks utility. Applicant is invited to demonstrate the existence and utility of the invention.

Response to Arguments

6. Applicant's arguments with respect to claims 1-25 have been considered but are moot in view of the new ground(s) of rejection.
7. Applicant's declaration under 37 CFR 1.132, see Exhibit A, filed 1/28/03, with respect to the evidence of utility, has been fully considered and is not persuasive since applicant has not provided proper evidence corroborating the statement stated in the declaration. For example, applicant should state actual test results of the bell, person(s) who conducted the tests, etc.
8. In view of applicant's remarks and as defined in the specification, the term "substantially in an harmonic sequence" has been defined as "the frequencies of the modes conforming to the ratios 1, 2, 3, ...etc. with the errors as stated in the specification and including the odd and even harmonic sequences.
